

Procella DA05-DSP Power Amplifiers

NOTE: For information on the legacy Procella DA-2800 and DA-2800DSP power amplifiers, please contact Procella Audio or your distributor.

The Procella DA05-DSP and DA06-DSP power amplifiers are highly versatile very high-performance professional amplifier designed to optimize the performance of any Procella Audio speaker system. We highly recommend them for all Procella installations. Both amplifiers provide optimization for all Procella models except the P15AMP and P15A subwoofers through the use of DSP presets. See below for details.

The DA05-DSP delivers 300Wx2 into 8 ohm loads and 600Wx2 into 4 ohm loads.

The DA06-DSP delivers 600Wx2 into 8 ohm loads and 1,200Wx2 into 4 ohm loads.

Additional detailed information is provided in the DA05-DSP & DA06-DSP User Guide. Please refer to this document when installing the amplifier.

DA05-DSP Presets

CAUTION: Use these presets ONLY with the specific speakers designated in the charts below. Use of the wrong preset can cause high levels of distortion and result in speaker damage that is not covered by warranty. These instructions apply only to the DA05-DSP and DA06-DSP.

Selecting a Procella Preset

Determine the appropriate setting for your speaker(s) from the chart below.

Then select the desired Preset:

- Push the MENU button
- Push the ADJUST/SET knob
- Push the ADJUST/SET knob again
- Turn the ADJUST/SET knob to the desired Preset
- Push the ADJUST/SET knob
- Turn the ADJUST/SET knob to select YES
- Push the ADJUST/SET knob
- Unmute the channels
- Verify that the display shows the correct Preset.

Locate your Procella speaker model in the adjacent chart and choose your preferred EQ setting from the left hand column. The correct preset number for your speaker configuration will be found in the Preset column. Use the front panel controls to select the appropriate Preset on your DA05 or DA06 (see pages 63 and 64). Connect your Procella loudspeakers to the amplifier per the listing in each output channel column.

DA05-DSP Presets

Version 3.0

For the latest version, see <https://procella.audio/downloads/#1432-wpfd-presets-support-da05-dsp-amps-5b55af9433c62>

PRESET	NAME	OUT CH 1	OUT CH2
